SUMMING UP THE STARS

An Astromical Estimate of the Members of the '09 Graduating Class of the Ocala High School

(Mabel Adele Bittinger.)

As it was the custom of ancient historians to embellish their works with many similes and figures of speech, so I who have been exalted to that high position of Class Historian, have tried to think of many ways to make this history interesting, to do justice to the pupils who compose this illustrious class of 1908-1909.

In this mood, one evening, I wandered alone the mountain paths that lead to the top of this I seated myself, full of the thought concerning the past events in school life of the pupils who compose this class.

As I, absent-mindedly gaze upward into the ethereal regions, my eyes are attracted to those nebular masses, planets, comets, meteors, satellites and asteroids, which exist in the heavens.

As I glance from one body to another, in the east there appears a group of stars, which forms the letters O. H. S. and this points directly to the north star, and as I study this I see the resemblance to Lucile Moore, who entered the school in the eighth grade. Like the north star Lucile has always directed our courses and has faithfully risen in darkest emergencies to light our way through devious paths. From the time Lucile entered the Ocala High School she has always been kind and considerate of her teachers by diligently applying herself to the tasks which they have given her.

Then I see the Great Orion, the night hunter, blazing through the misty heavens. This, it seems to me, represents one of the well known characteristics of Phil Robinson, who is noted for his fondness for tennis, motoring, boating, golfing and all out of door sports. But in his eagerness to enjoy himself, he was never known to neglect the assigned tasks. Phil entered this class, or rather laid the foundation of its greatness, by being in the first grade. Although we know Phil has many good points, let us not forget that, like the rest of us he is human. But I shall say that if his good and bad qualities were carefully weighed we would find that his good ones would far outweigh his bad ones, as his many teachers have found out.

Then I behold the pale moon who shed her silvery rays over the dark earth. And while I gazed at her she reminded me of our fellow classmate Maggie Lytle. Although somewhat smaller than the rest of her class, like the moon, she has a powerful influence over her companions. As I first remember Maggie she looked very small and lonesome in the seventh grade, her first trial in a city school. I saw Maggie somewhat apart from the rest, with her head buried deep in well known geography. Ever since then I have known Maggie to be an industrious and diligent student, working while others were playing and in the end always coming out in advance.

And lo, far to the east gleams the great Saturn with his many satellites, like Gary Beck with all the remaining seven of us following in utter bewilderment, the progress of an algebraic example at unspeakable length, on through the dark and intricate and often obscure passages of radical and quadratic equations and also of those horrible sines, cosines tangents, cosecants and those uncomprehensible logarithms which were contained in that all night trigonometry. Although Gary has been with us only eight months, still he has left in our memory the stamp of his genius. At some times we know Gary is hopelessly bewildered at Mr. Workman's many unanswerable questions, but we know, all the time, that Gary knows exactly how and the whys of it.

Then next in order in this brilliant constellation I see Uranus which seems in many ways to shine forth the traits of Marion Pelot. The historian has many times inquired of Marion when he entered school, but the memory of that time seems so dim, that it was so long ago that he has forgotten, and like Uranus in the heavens so with Marion in the class, has been there since the beginning. Then as we know Uranus has many satellites, so Marion has many followers through his school course. He now like Uranus has one well known one, and that constantly seems to move backwards. Ever since I have known of Marion he has always been a friend to the entire class. Though buffeted and uninjured by the storms from angered instructors he still retains his bright and shining countenance.

But to find anybody in the heavens that can be compared to the brightness of my own school career, could with the greatest difficulty be found. But there far off, on the curve of the horizon I see the faint glimmering, which reminds us of the often heard nursery rhyme,

"Twinkle, twinkle little star,
How I wonder what you are."

The light which this small body radiates may be compared to the little star, and undoubtedly a good portion of that is absorbed from the glowing members around it, and the pure light seemed to be tinged with a greenish hue.

I racked my brains to find somebody to compare to Robert Anderson. As we all know Robert has made a great record while he has been in this school. He entered the eighth grade and each year has advanced in his cleverness and aptness. But, look, there dashes across the sky, sweeping toward in a blaze of glory a light, far outstanding the surrounding planets, which look pale when compared to this magnificent spectacle. It is Halley's comet, known far and wide through the educational world. But not until it is almost past did I think to

compare it to Robert, then I began to think of Robert's future, will it like Halley's comet bring instruction and knowledge to all the world or will it like the comet, entering this group in a blaze of light, pass suddenly away and pass into seven-five years of oblivion.

As the night wanes there suddenly bursts forth before my eyes the sun, and I immediately thought of Walter Liddell, who has won our wonder and admiration by his daily brilliant progress. Like the sun he shines forth in the morning with his intellect, and again like the sun not to set in the evening forever, but to rise in the morning seeming brighter after the interval of darkness. Although Walter only entered the class in the eleventh grade, all have learned to regard him with the greatest respect and esteem.

Then we see by the poor description of this far-famed class that it is worthy to be written of by a more competent person than myself.

Although at times it has not always been as now, it has like the stars in the heavens always been constant, and may it be as a sign to which the future classes may turn to and admire, let them hope to be able to follow in the footsteps of this class of 1908-1909.

HOW'S THIS

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.
F. J. Cheney & Co.,
Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

Walding, Kinnan & Marvin,
Wholesale Druggists, Toledo, O.
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c per bottle. Sold by all druggists. Take Hall's Family Pills for constipation.

STRIKE ENDED SATURDAY

The Georgia Railroad and its Firemen Came to an Agreement Just in Time to Avoid Federal Interference

Atlanta, May 30.—The strike of the firemen on the Georgia railroad was officially declared off at 2 p. m. yesterday. An hour and a half later the first train after the resumption of service was sent out of Augusta with a negro fireman in the cab.

The terms of the settlement were not officially given out, but it was learned that they are substantially as follows:

The men are to return to work under conditions existing at the time the strike began until final adjustment is made.

All negro firemen at the terminal stations will be dispensed with.

All discharged brotherhood firemen will be reinstated.

Three other points are yet to be decided as follows:

First, whether negro firemen shall be eliminated from the road.

Second, if not eliminated, what percentage of negroes there shall be.

Seniority of white firemen over negro firemen.

The questions are to be settled by arbitration under the Erdman act.

While the conference was being held Governor Smith was writing a peace proclamation.

Of especial significance was the report that some adjustment had to be reached by 6 o'clock yesterday afternoon or the federal courts would take cognizance.

AN IDEAL COUGH MEDICINE

"As an ideal cough medicine I regard Chamberlain's Cough Remedy in a class by itself," says Dr. R. A. Whitshire, of Gwynneville, Ind. "I take great pleasure in testifying to the results of Chamberlain's Cough Remedy. In fact, I know of no other preparation that meets so fully the expectations of the most exacting in cases of croup and coughs of children. As it contains no opium, chloroform or morphine it certainly makes a most safe, pleasant and efficacious remedy for the ill it is intended."

NOTICE OF TEACHER'S EXAMINATIONS

Notice is hereby given that the regular state uniform examination for teachers will be held in Ocala beginning on Tuesday, June 8, 1909. The white applicants will be examined at the Ocala High School building, and the colored at Howard Academy. It will be necessary for applicants to provide themselves with legal cap, pens, pens and ink for the work and the legal fee of one dollar for each applicant will be charged.

Very respectfully yours,
5-13dwf J. H. Brinson,
Superintendent for Marion County.

IF YOU KNEW

the merits of the Texas Wonder, you would never suffer from kidney, bladder or rheumatic trouble. \$1 bottle two months' treatment. Sold by druggists or by mail. Send for testimonials. Dr. E. W. Hall, 226 Olive Street, St. Louis, Mo.

STENOGRAPHER WANTED

A stenographer wanted. Can board with family at the mills. Apply in person or in writing to Sumner Lumber Co., Zuber, Fla. 5-21

A LIVING SKELETON

is the final condition of any child that has worms—if it lives. Think of having something in your stomach that eats all you take as nourishment. Nine tenths of the babies have worms, many of yours has. Be certain that it has not by giving it White's Cream Vermifuge—it expels all worms and is a tonic for the baby. Price 25 cents, at the Anti-Monopoly Drugstore.

400 ladies' trimmed hats, worth up to \$4 each, \$1.95 while they last. At the Globe.

DeWitt's Little Early Risers, the famous little liver pills, small, gentle and sure. Sold by all druggists.

TO REGULATE OPTOMETRY

The New Law Will Cut Out the Sight-Killing Street-Corner Optician

Following is the full bill, which has been passed by the house and senate, signed by Governor Gilchrist, and becomes a law in 60 days. Dr. Boney of this city spent 10 days in Tallahassee looking after this bill and is much elated over its passage. The bill was introduced by our Senator Baker:

Be It Enacted by the Legislature of the State of Florida:

Section 1. That the practice of Optometry, for the purpose of this act, is defined as follows, viz: The use or employment of tests or examinations for the determination of the natural and functional deficiencies of the eye and the adaptation of lenses for the aid thereof.

Sec. 2. There is hereby created a board to be known and styled the "Florida Board of Examiners in Optometry," to be composed of five regular opticians, residents of the state of Florida, who have been engaged in the practice of optometry in said state for two years. Said board shall be appointed by the governor as soon as practicable after the passage of this act, one member for a term of one year, one for two years, one for three years, two for four years, and each until his successor is appointed and qualified; any term of members thereafter appointed shall be for four years, provided, however, that the appointment to fill vacancies, which the governor is hereby empowered to make, shall be for the unexpired term.

Sec. 3. Said board of examiners shall elect at its regular meeting, annually thereafter, one of its members as president and one as secretary and treasurer, and shall hold a regular meeting at least once each year at such time and place as the said board may determine; special meetings may be called and held at such times and places as may be designated by the president and secretary, and such special meetings shall be held upon the application of five applicants for appointment. At least thirty days notice of any regular meeting shall be given by publication once a week in a newspaper of general circulation throughout the state.

Sec. 4. Three members of said board shall constitute a quorum for the transaction of business, and should a quorum not be present on the day appointed for their meeting those present may adjourn from day to day or to some designated day until a quorum is present.

Sec. 5. Said board shall make such rules and regulations not inconsistent with law as it may consider necessary to the proper performance of its duties; may take testimony concerning any matter within its jurisdiction, and each member thereof may administer oaths. It shall be the duty of said board to examine thoroughly every applicant desiring to practice optometry in this state, and if a majority of said board shall be satisfied that said person is competent and possesses the knowledge essential to such practice, they shall grant him a certificate to that effect and enter his name on their records as a registered practitioner. The secretary shall keep a full record of the proceedings of the board, which record shall at all reasonable times be open to public inspection.

Sec. 6. Every person, except as hereinafter provided, before beginning to practice optometry in this state after this act shall go into effect, shall pass an examination before said board of examiners as provided in section five of this act, and any person having signified his desire to be so examined, shall appear before the board at such time and place as they may designate. Before taking said examination, the applicant shall pay, for the use of said board in defraying the legitimate expense, as hereinafter provided, the sum of ten dollars, and if he shall successfully pass said examination he shall be paid for the same by the board as aforesaid, the further sum of five dollars upon the issuance to him of the certificate of qualification to be signed by the president and secretary.

Sec. 7. The certificate provided for in the two preceding sections shall be recorded in the office of the clerk of the circuit court of the county in which such practitioner may reside or sojourn, and in any county where he may practice, in a book to be kept by the clerk for that purpose, before the person to whom it is granted shall be entitled to practice by virtue thereof; and when so recorded the clerk shall certify thereon under his official seal the fact and date of such record, and shall return such certificate to the person to whom the same was granted and shall be entitled for such service to collect from the holder thereof, the legal fee for recording.

Sec. 8. All persons to whom may

have been granted a certificate of graduation or diploma, indicating competency of the holder to engage in the practice of optometry, by any well recognized school, college, or institute wherein instruction in the essentials of optometry may have been taught, and who may have been engaged in the practice of optometry in the state of Florida for a period of two years prior to the date of the passage of this act, are exempt from the examination herein provided for, and on presenting to said board such certificate of graduation, or diploma, or in the event of the loss of the same, satisfactory evidence of its issuance, and on presenting satisfactory proof by affidavit or otherwise that the party applying for certificate is exempt from examination under this section, such person shall be entitled to receive from said board a certificate of qualification upon the payment of the sum of five dollars therefor; provided, the application for such certificate be made in writing within six months from the passage of this act, and if not so made all right to a certificate under this section is waived and forfeited, and the same shall issue only after successfully passing examination and paying fee as provided in section six. All persons exempt from examination as above, may practice without a certificate from said board for a period not exceeding six months from the passage of this act, and such certificate when issued shall be recorded as if based upon examination.

Sec. 9. Out of the funds coming into the possession of said board, each member thereof may receive as compensation the sum of five dollars for each day he is actually engaged in the duties of his office, and mileage at three cents per mile, for distances necessarily traveled in going to and coming from the meetings of the board. The said expenses shall be paid from the fees and assessments received by the board under the provisions of this act, and no part of the salary or other expenses of the board shall be paid out of the state treasury, or be a charge against the state, nor shall the state be in any wise responsible for any indebtedness which may be created by said board. All moneys received by said board shall be held by the secretary as a special fund out of which may be paid the per diem allowance and mileage of said members aforesaid, and the expenses incurred by the board in carrying out the provisions of this act and the said board shall make an annual report of its proceedings to the governor on the first Monday in January of each year, which report shall contain an account of all moneys received and disbursed by them in pursuance of the provisions hereof.

Sec. 10. Any person who shall hold himself out to the public as a practitioner of optometry, without first complying with the provisions of this act, or who shall violate any of the provisions of said act, shall be deemed guilty of a misdemeanor and upon conviction, shall be punished by a fine of not less than twenty-five dollars nor more than two hundred dollars, or by imprisonment not exceeding six months.

Sec. 11. Nothing in this act shall be construed to apply to physicians and surgeons authorized to practice under the laws of Florida, nor to dealers in optical goods who sell spectacles, or eye-glasses, without attempting to traffic upon skill in adapting them to the eye.

Sec. 12. All laws and parts of laws in conflict with the provisions of this act are hereby repealed.

Following are the names of the practitioners who were appointed by the governor on the examining board: Dr. T. G. Yates, Pensacola; Dr. N. H. Clark, Daytona; Dr. J. Gumbinger, Jacksonville; Dr. D. M. Boney, Ocala, and Dr. H. E. Lough, Tampa.

From the Times-Union

As previously stated, two professions have been legalized by the legislature during the present session, osteopathy and optometry. The governor has signed both bills and named examining boards for each of the professions as follows:

Osteopathic Examiners—Dr. Paul R. Davis, Jacksonville, to serve four years; Dr. Elbert E. Berry, Tampa, to serve three years; and Dr. E. C. Bennett, of Pensacola, to serve two years. Dr. Davis, the president of the association, is well and favorably known in Jacksonville, and the passage of the bill giving protection to his profession is due largely to his efforts.

Board of Examiners in Optometry—Dr. F. G. Gates, Pensacola, to serve one year; Dr. W. H. Clark, of Daytona, to serve two years; Dr. J. Gumbinger, Jacksonville, to serve three years; Dr. D. M. Boney, Ocala, to serve four years; Dr. H. E. Lough, Tampa, to serve four years.

The Florida Optical Association was organized in Jacksonville under the direction of the American Opticians of the United States, January, 1908, and elected officers at the time as follows: Dr. D. M. Boney, Ocala, president; Dr. H. E. Lough, Tampa, vice president, and Dr. Edwards, secretary. The membership extended all over the state from the start. During 1908 the association performed some good work in advancing their cause. In January, 1909, at the association's annual meeting in Ocala officers were elected as follows: Dr. D. M. Boney, Ocala, president; Dr. H. E. Lough, Tampa, vice president, and Dr. C. E. Taylor, secretary. Being enthused by the advancement made in their profession, the members of the association were enabled to introduce an optometry bill at this session of the legislature, and their efforts have been rewarded by the bill passing, being signed by the governor and an excellent examining board appointed.

REV. I. W. WILLIAMSON'S LETTER

Rev. I. W. Williamson, Huntington, W. Va., writes: "This is to certify that I have used Foley's Kidney Remedy for nervous exhaustion and kidney trouble and am free to say that it will do all that you claim for it." Foley's Kidney Remedy has restored health and strength to thousands of weak, run-down people. Contains no harmful drugs and is pleasant to take. Sold by all druggists.

WHAT A BANK DOES

There are many ways in which it serves the public, but the one now most valuable, perhaps, is to help with loans. We will meet the needs of conservative borrowers.

The Munroe & Chambliss Bank
